Description:

The OMNITRONIC MZD-88 is an audio mixer with an analog matrix of 8 input and 8 outputs which allows for multiple output configurations and inputs mixing. The 8 outputs are divided in 4 groups. Thus it's possible to supply 4 different PA zones with a stereo output by routing different input signals to these zones without having to change the cable configuration. It's also possible to obtain 8 outputs with different mixing as every input has its own level and PAN controls. Perfect for any place where multi-zone or multi-room solutions are required, just like in theme parks, conference centers, schools or as the case may be. By the way, the MZD-88 could also be used for personal monitoring.

Features:

- Matrix input assignment: 8 audio inputs are freely assignable to each of the 8 outputs
- Inputs and outputs via balanced XLR connectors
- (19") 48.3 cm rack installation 2 U
- For application areas such as: Installation; restaurants, bars and hotels; sports centres/gyms
  Package contents
- 1 x device, 1 x user manual, 1 x power cord
