Description:

Compact, lightweight and useful: The WAMS-10BT2 MK2 is an extremely lightweight yet powerful PA system with rechargeable battery for mobile use. Whether for street musicians, at lectures, family get-togethers or in the aerobics group: Thanks to the versatile connection options you are flexible on the road. The great-sounding all-in-one system with power-efficient class D amplifier and 80 watts output power neither requires power nor audio cables. Enjoy music wirelessly from your smartphone or any other Bluetooth device via the integrated Bluetooth audio receiver. Delivery includes 2 license-free wireless microphones for announcements and moderations. A bodypack transmitter is available as an accessory.

The latest Bluetooth 5.0 technology with TWS support ensures fast and stable wireless connections and links two PA systems for stereo setups. The 2-way bass reflex system with 25 cm (10") woofer provides powerful sound despite the small size. Equipped with a 3-channel power mixer, the WAMS-10BT2 MK2 also features an MP3 player with SD card slot, USB port and IR remote control. A stereo input channel for line sources (e.g. CD player or notebook) and two mono input channels for instruments or cabled microphones provide additional flexibility. The 2-band EQ lets you control bass and treble.

The powerful 12 V battery allows for continuous playback at full volume for up to 4 hours. By retrofitting an additional battery, the operation time can even be doubled. The WAMS-10BT MK2 is easy to carry via its trolley handle and wheels. The lightweight ABS enclosure allows for tripod mounting.
