High-quality microphone cable

Art. No.: 3030744L

GTIN: 4049371001830

**List price: 148.75 €**

incl. 19% VAT.

Description:

A thick skin protects the inner workings from mechanical stress such as pulling, pulling and knotting. That is why we have given the Stage 22 Highflex a thick 6.40 mm outer jacket. But also the electrical data and the technical construction are impressive: The Stage 22 Highflex offers low capacity and high bending cycles, thanks to the fine-wire and tightly stranded individual strands.

The shielding made of bare copper wires has an optical coverage of 99 % (instead of the usual 85%).

The Stage 22 Highflex is therefore the ideal cable for the stage, the home recorder, the rental company and the ELA technician. The Stage 22 Highflex is a very cheap cable, but you don't have to compromise.

Features:

- High transmission quality due to the use of fine stranding
- Very rugged owing to the thick, soft PVC jacket
- Outstanding shielding due to dense shielding
- High flexibility makes it easy to reel
- Made in Europe
- For application areas such as: Homerecording and studios; Stage

Technical specifications:Cable construction: 2 x 0,22 mm² Audio cable

Cable length: 100 m
