Features:

- LED controller with Wi-Fi technology for a smart home
- 5-in-1 function to control multi-colored (CCT, RGB, RGBW, RGB+CCT) and single-colored LED strips
- Works without a bridge or hub
- Control multiple controllers at the same time
- Excellent signal transmission with 2.4 GHz - no perceptible difference to a wired system
- Innovative wireless technology allows multiple controllers to be controlled synchronously and asynchronously with just one remote control
- Synchronous color sequences even over several hours with multiple controllers and different LED types
- All controllers communicate with each other and cover a large range
- PWM outputs make it ideal for use with modern LED strips
- Memory function saves last setting when switching off
- Control via Wi-Fi; Amazon Alexa; Google Assistant; IFTTT; Tuya Smart app; Sound to light
- Variable color temperature 3000 K - 6500 K
- Dimmer electronic; color change adjustable; pulse-width modulation variable; scenes adjustable; program speed adjustable
