### Features:

---

- External equipment, such as sensors, bring additional automation processes and interaction to any LED project using MADRIX software
- This digital input device registers if its circuit is either open or closed. In most cases, it is used to build a switch or trigger
- Incoming values are directly translated into DMX data in the MADRIX software
- MADRIX I/O requires MADRIX 3. Please update at least to MADRIX 3.4
- More information available at [www.madrix.com](http://www.madrix.com)
- The device can be connected via USB to the PC in connection with MADRIX software
- Made in Germany
