Description:

Mr. Brightside!

Surely you know floodlights in football stadiums. They are unbelievable bright and really turn night into day. A dimension smaller, that is where our new EUROLITE LED floodlight is located. Stages for bands, DJs, solo entertainers or discotheques belong to its field of application. But in comparison to the stadium illumination it holds one decisive benefit. Thanks to its red, green, and blue LEDs unlimited color variations can be mixed and you do not have to narrow down to merely monotonous white. In combination with smog, completely drenched in the floodlight, one of the most classic and still impressive effects arise. But the floodlight is able to achieve more than only color changes. Its programs can either be read back via a control at the device itself, or via DMX. Moreover there is the possibility, to operate the 63 LEDs sound controlled, by a built-in microphone.

Features:

- RGB color mixing for infinite color variations
- Ideal for bands or solo entertainers
- 63 LEDs (21 x 1 W LEDs per color)
- With integrated control for program selection and speed adjustment
- Master/slave function
- Controller connection and synchronisation via two 3-pin XLR plugs
- DMX512 control via regular DMX controller (occupies 5 channels)
- DMX addressing via DIP switches
- Sound controlled via built-in microphone
- Microphone sensitivity adjustable via rotary control
- Remote control via optional footswitch
- Built-in ventilation fan for safe continuous use
