

## EUROLITE LVH-5 Automatic video switch

Automatic video switch 4:1

Art. No.: 81013205

GTIN: 4026397324808

**List price: 48.2 €**

incl. 19% VAT.

### Description:

#### MANUAL AV SWITCH 4:1

The LVH-5 was designed to switch video signals from up to four sources to one output. Switching is made automatically and is indicated by control LEDs. The switching time is adjustable. Each channel features a manual override button to stop the sequencing mode. Each input is provided with a parallel output for feed-through of the input signal. The open collector outputs allow for controlling other units. Power connections are made using block terminals. The unit is compatible with NTSC and PAL systems.

### Logistic

EAN / GTIN: 4026397324808

Weight: 0,46 kg

Length: 0.17 m

Width: 0.10 m

Height: 0.06 m

### Features:

- Automatic switching of video
- Switching time adjustable
- 4 inputs with feed-through output via BNC plugs
- Each channel with manual override button and LED indicator
- Open collector outputs for controlling other units
- NTSC and PAL compatible
- Super compact metal housing
- 12-24 V DC power supply via block terminals (PSU not included)

### Technical specifications:

Power supply: 12-24V DC 110 mA

Frequency range: 10 - 10000000 Hz

S/N ratio: >70 dB
