### Description:

With its playful appearance, the small skeleton is the ideal addition to your Halloween decorations - even if you want to keep the scare factor low.

The skeleton appears to have crawled straight out of the ground, as shreds of dark green thread and artificial moss give it an eerily beautiful aura. At 40 cm, this lightweight figure is quick to decorate and cuts a fine figure anywhere: whether as an eye-catcher on your desk, on the shelf or on the Halloween buffet.

With movable limbs on its arms and legs, it can even sit on its own, giving any spooky party a ghoulishly beautiful atmosphere in no time at all.

Give your Halloween decorations that special something with this charming little fellow!
