Description:

The dark side of the power!
Although it doesn't shine black in fact, it yet is colloquially called like that: the black light. Anyway, the effect is very popular and a real lighting classic. But not only because of this we are quite sure, that our MIK UV 160W will find many friends. Because whether for architectural lighting or large stage backgrounds, its power enthuses. The jet-proof and robust construction is perfectly suited for out-of-doors and by the way, can be installed on open air events to deflect mosquitos from getting on the nerves of the spectators.
