Description:

At home at the theatre!

Raise the curtain for the EUROLITE PAR-64. As it plays its best role on theatre stage. In comparison with the more and more popular LEDs their advantages are a slightly better luminosity and its effect. The light of LEDs can be described as somewhat cold und thus the spotlighted actors appeal pale, although not intended. So, many put their faith in the conventional illuminants, because they radiate more warmth and thereby the stage performance becomes more vivid. That does not leave anyone cold!

Caractéristiques:

- DMX controlled color changer
- RGB color mixing
- High-quality housing for high stability
