Description:

Improved technology - higher performance! The LED Audience-blinder is a new broom that sweeps clean. Of course, it does not sweep, but therefor it shines in a real fascinating manner. Compared to traditional blinders with halogene lamps, the power consumption is very low. Maybe the LEDs are not able to shine 40 metres far, but with their long-life guarantee and their possibility to perform color changes, strobes or other effects, the advantages of the LED blinder must not be denied. You can really put your trust on it, disappointment excluded!
