Description:

In front of buildings or public places, the LED-PAR-64 and the LED floodlight are in real good hands. The colors are static and change automatically. Due to the LED technology, the LEDs shine amazingly bright. Moreover, these outdoor spots are able to strobe and thus have an attractive effect in addition to their nine integrated programs. To not be vulnerable to humidity, DIP switches were set aside. The spots can be linked and completely managed via a remote control.
